EDUCATION

Bachelor of Science, Computer Science

University of California, Davis

Sept 2022 – Dec 2025 | Davis, CA

- Relevant Coursework: Machine Learning, Computer Vision, Scientific Computation, Database Systems, Operating Systems

EXPERIENCE

Data Analyst Intern

US Cryotherapy

June 2022 – August 2022 | San Ramon, CA

- Trained regression models using NumPy and Pandas to deliver insights on 5 years worth of customer and operational datasets.

Computer Vision Engineer

Red Tie Robotics

Nov 2015 – April 2017 | Danville, CA

- Used Java and OpenCV to implement and optimize movement and vision functionalities in two FIRST robotics competitions.

PROJECTS

ResNet Bone Fracture Classifier

University of California, Davis

- Developed a transfer learning model using ResNet50 and PyTorch, achieving 80% accuracy in classifying hand, humeral, and femoral fractures.
- Employed data augmentation techniques to optimize flexibility.

DNDIgor

Discord

- Engineered a SQLite and Node.js-powered Discord bot for the purpose of storing/manipulating TTRPG campaign data.
- Used the Discord.js API for in-app slash-command functionality.

SUMMARY

"Curious, thoughtful, and determined software engineer with a knack for ML applications."

ACHIEVEMENTS

BSA Eagle Scout
Awarded in 2018 from Troop 36

Vitalant Vital Elite
O- 2RBC Donor 4x/year

5x MtG Arena Open Champion
$8500+ in lifetime winnings

SKILLS

Machine Learning | Data Science | Game Design | UI Design | Debugging

TECHNOLOGIES

Node.js | Pytorch | SQLite | PostgreSQL | Svelte | NumPy
